

## ASSIGNMENT 4

|         |                  |
|---------|------------------|
| Date    | 02 November 2022 |
| Team ID | PNT2022TMID54258 |
| Roll No | 111919106044     |

**Write code and connections in wowki for ultrasonic sensor.**

**Whenever distance is less than 100cms send “alert” to IBM cloud and display in device recent events.**

**Program Code:**

```
#include "Ultrasonic.h"
Ultrasonic ultrasonic(6,2);
int distance; void setup()
{
  Serial.begin(9600);
}
void loop() {
  distance = ultrasonic.read(CM);
  Serial.print("Distance in CM: ");
  Serial.println(distance); if
  (distance < 100)
```

```
Serial.print("alert");
```

```
Serial.println();
```

```
delay(3000);
```

```
}
```

## OUTPUT:

The screenshot displays the Arduino IDE interface with a simulation running. The code on the left is as follows:

```
1 #include "Ultrasonic.h"
2 Ultrasonic ultrasonic(6,2);
3 int distance;
4 void setup() {
5   Serial.begin(9600);
6 }
7 void loop() {
8   distance = ultrasonic.read(CM);
9   Serial.print("Distance in CM: ");
10  Serial.println(distance);
11  if (distance < 100)
12    Serial.print("alert");
13    Serial.println();
14    delay(3000);
15  }
16
```

The simulation window on the right shows an Arduino Uno connected to an HC-SR04 ultrasonic sensor. The serial output window displays the following data:

```
Distance in CM: 317
Distance in CM: 162
Distance in CM: 47
alert
```

The status bar at the bottom indicates a temperature of 30°C, a cloudy weather condition, and the time 7:38 PM on 10/28/2022.
